Maximizing Individual and Corporate Potential

Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.

This report analyzes behavioral style, that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements which are true or areas of behavior in which tendencies are shown. This valuable information will enable you to thoroughly prepare and conduct the selection/interview process by providing you with a deeper understanding and knowledge of how the candidate can best fit the position you have to offer.

1. Describe your career goals:
2. How do you plan to achieve these goals?
3. What factor do you feel may hinder your success?
4. What do you expect from your manager?
5. How do you determine your priorities?
6. What are your most significant accomplishments?
7. How do you deal with people you don't like?

Natural Style

Norm 2009

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
